

**3-5 Grade Science Curriculum**  
**The Practice of Science and Engineering**  
**On-Going**

**Big Ideas:**

- Close observation can lead to good questions
- Models help simplify and clarify how to solve a problem
- Good questions suggest useful models
- There are many different types of models
- Before we measure anything, we need to understand “what?, Why?, and How?”

**Essential Questions :**

- Who uses the scientific method?
- What is a good question?
- What is the link between what we already know and the question(s) we ask?
- How do we decide which instrument to use for a valid measurement?
- What do we mean by “valid”?
- How do we make meaningful sense from the data?
- How do the elements of an experiment follow the logic of the scientific method?

**Vocabulary:** Experiment, evidence, hypothesis, inference, inquiry, investigation, microscope, observe, predict, procedure, reference manual, scientific methods, three-dimensional, two-dimensional

Students who demonstrate understanding can:

- 3-5-EST1-1** Define a simple design problem reflecting a need or a want that includes specified criteria for success and constraints on materials, time, or cost.
- 3-5-EST1-2** Generate and compare multiple possible solutions to a problem based on how well each is likely to meet the criteria and constraints of the problem.
- 3-5-EST1-3** Plan and carry out fair tests in which variables are controlled and failure points are considered to identify aspects of a model or prototype that can be improved

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

<p><b>Science and Engineering Practices</b></p> <p><b>Analyzing and Interpreting Data</b>          Analyzing data in 3–5 builds on K–2 experiences and progresses to introducing quantitative approaches to</p>	<p><b>Disciplinary Core Ideas</b></p> <p><b>ESS2.D: Weather and Climate</b></p> <ul style="list-style-type: none"> <li>• Scientists record patterns of the weather across different</li> </ul>	<p><b>Crosscutting Concepts</b></p> <p><b>Patterns</b></p> <ul style="list-style-type: none"> <li>• Patterns of change can be used to make predictions. *Common Core State Standards Connections:*

*ELA/Literacy —*

**RI.3.1** Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers. (3-ESS2-2),(3-ESS3-1)

**W.3.7** Conduct short research projects that build knowledge about a topic. (3-ESS3-1)

**W.3.8** Recall information from experiences or gather information from print and digital sources; take brief notes on sources and sort evidence into provided categories. (3-ESS2-2)

*Mathematics —*

**MP.2** Reason abstractly and quantitatively. (3-ESS2-1),(3-ESS2-2),(3-ESS3-1)

**MP.4** Model with mathematics. (3-ESS2-1),(3-ESS2-2),(3-ESS3-1)

**MP.5** Use appropriate tools strategically. (3-ESS2-1)
