

Bayside Engineering is a small and local civil engineering firm that specializes in wastewater treatment. We are looking for a highly motivated Junior, Senior, or Homer High Graduate that is looking to study in the STEM field. This individual would need to have a driver's license, access to their own vehicle, a PC laptop, and be willing to work about 20 hours a week. Their responsibilities would include site visits to take as built dimensions of newly constructed septic systems, writing professional documents for submittals to government agencies, and AutoCAD drafting. No prior experience is needed. Pay is \$15/hr and the starting date is flexible depending on individuals school and break schedules. Please send resumes to kalie.rubalcava@gmail.com.

My personal and business goals would be to provide professional employment to local kids who leave for their engineering/technology degrees and want to move back home to Homer someday.

Thank you,

Kalie Rubalcava, Civil E.I.T.
