Remote Learning Update

January 18, 2021

This Week:

Arena and I are working on Informational texts this week. We will be reading informational texts and looking for the main ideas and supporting details to back up our inferences. We will be writing informational texts on something we know about...teaching our classmates about an area we know a lot about.

In math we will be continuing to understand fractions. Fourth and fifth graders will be adding fractions with unlike denominators. Third graders will be finding equivalent fractions. Second graders will be exploring fractions. Kinder and first grade will be skip counting, and counting to 1000- skip counting by 5's, 10, and 100's.

Lexia Core 5 and IXL

Is available to everyone in class if you are interested in using it at home.

If you would like a list of standards we are covering this week, please contact one of us and I will be happy to get that too you!
