

Phil Biggs Employee Recognition

Phil Biggs has been part of the Kenai Peninsula Borough School District team since 1995 when he was hired as the Director of Technology.

Tremendous technological change has taken place within our district during the past five years. Phil's passion for technology and his unique ability to teach and share this tool with others has better prepared schools and students to meet recently adopted standards and measures of accountability.

As web master for the District's webpage, Phil's work has received recognition throughout Alaska and nationwide. He has been instrumental in video streaming school events that provide extended family members the opportunity to view live events such as concerts and school graduations from afar. With Phil's guidance and technical support, the District has recently reached out into the area web conferencing.

It is because of his willingness to extend far beyond that which is expected, that the We, the Board of Education, recognize Phil Biggs as an outstanding employee of the Kenai Peninsula Borough School District.
