

KPBSD Educational Technology Standards Overview

The District Educational Technology Committee recommended adopting the six National Educational Technology Standards for Students (NETS-S) along with the Performance Indicators. The committee aligned these standards to the State of Alaska Technology Content Standards and developed Grade Level Expectations for students in grades K-12 that address each of the standards and performance indicators. These standards and grade level expectations will be addressed in future curriculum revisions.

The committee also developed a KPBSD Skills Continuum for students in grades K-8 which incorporated input from district teachers and was aligned to the recommended standards and grade level expectations. Teachers may use this document to guide them as they integrate technology into the curriculum.

2010-2011 Committee Members

Vaughn Dosko, Administrator	Kenai Middle School
Peter Swanson, Administrator	McNeil Canyon Elementary School
Jennifer Dowd, Administrator	K-Beach Elementary School
